

AROHAN HEALTH

SMTP Activation & Email Setup Guide

Date: April 26, 2026

1. Domain Email Verification

Before the mail server can activate, you must verify ownership:

- Check the email sent from Resellerclub.com to mrudhula.uriti@gmail.com.
- Click the verification link to authorize the domain for mail services.

2. Creating your "Sender" Email

Use the cPanel credentials provided by the DSC Web Team:

Login URL:	http://haspranahealth.com:2095/
Username:	haspranahealth
Password:	R@,sx-UbS)H\$

Action: Open "Email Accounts" in cPanel and create "alerts@haspranahealth.com".

3. Application configuration

Update the .env.production file on your AWS server with these details:

```
SMTP_HOST=mail.haspranahealth.com
SMTP_PORT=587
SMTP_USER=alerts@haspranahealth.com
SMTP_PASSWORD=R@,sx-UbS)H$
```

4. Restart and Activate

Run the following commands in your server terminal to apply changes:

```
cd /home/ubuntu/app && sudo docker compose restart backend
```
